I already posted in the video area but if you guys could figure a really simple way for people to convert halo 3 video's on their x-box 360 to a pc and/or mac alot of halo 3 players would use this site for that. If you do figure it out i would recommend posting that on bungie.net and mlgpro.com cool

there is already a site for that called geevee , they grab the videos from your fileshare and put them on there website , but the grab system is down for a while because of the updates to there website , people used this website to convert the media from geevee (flv) to wmp to put them on sites like youtube

edit:the converter doesn't work good anymore to convert video's from geevee
