I have been converting files here for a few weeks and it's great. Past 2 days, I realized that converting cannot be done. The conversion progress used to show up.

These 2 days, I have clicked "OK" but yet the converting doesn't start. The conversion seems like it's not working. Now my "mini project" is being put on hold because I can't convert at all.

Now I can convert again. This is really weird!

Can admin close this thread? Thanks!
